CUSTOM AI · DATA · SECURE SYSTEMS

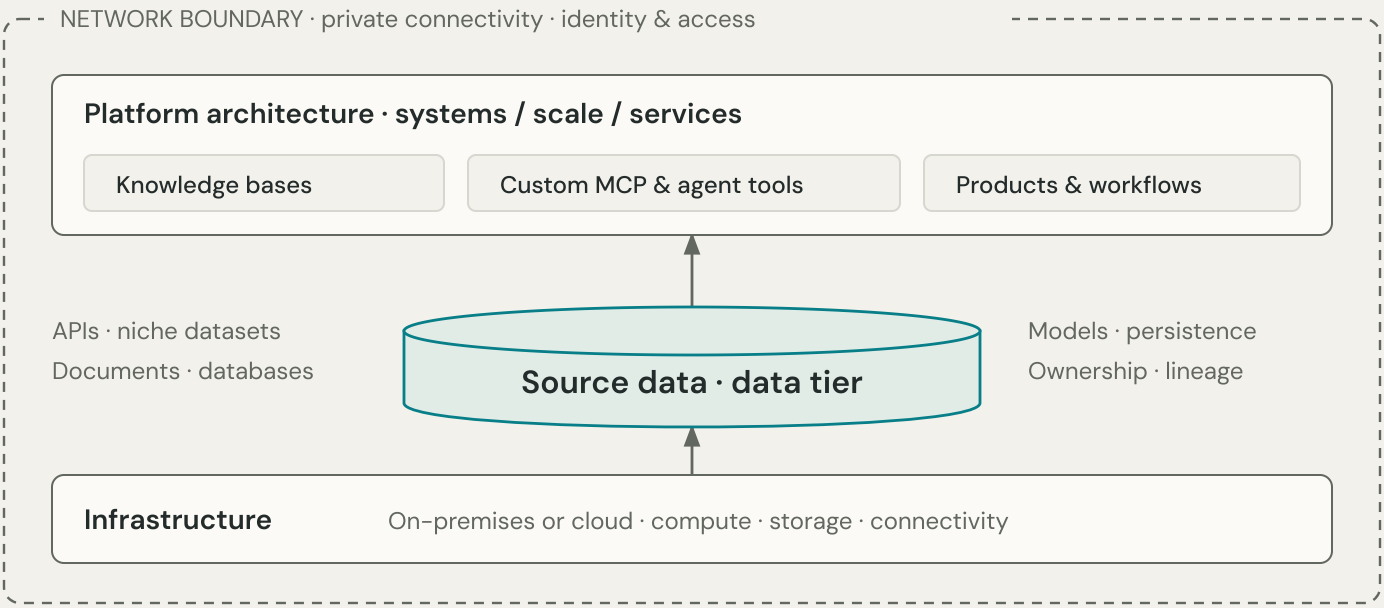

It all starts with source data.

We start with your data, design the network and platform, and build useful AI on a sound systems foundation. Based in Fort Worth.

Locally owned and supported in Fort Worth. The team that builds it supports it.

$15,000	project minimum at least three months
$5,000	monthly retainer ongoing engineering
$250	per project hour scope by proposal

01 The foundation for useful AI

Across every layer: cyber defense · cloud posture · testing · independent review

02 What we build & review

Six capabilities. One engineering partner.

Custom MCP & agent tools
Custom MCP servers and tools for internal agents, proprietary APIs and niche data.

Knowledge bases & data foundations
Knowledge bases, semantic models and cited retrieval from your documents and records.

Private networking & testing
Private connectivity, identity, segmentation, sandboxes and integration testing.

Cyber defense & cloud security posture
Cyber defense, cloud posture reviews, hardening and verified remediation.

Product engineering & AI coding support
Product engineering, AI coding support, code reviews, tests and delivery.

Independent architecture & codebase reviews
Third-party architecture, codebase and cloud reviews with evidence and a prioritized roadmap.

03 Fort Worth first

Based in Fort Worth. Serving Tarrant County, Dallas-Fort Worth and North Texas, alongside your founders, engineers, operators and vendors.

04 Start a conversation

Bring a workflow, system or review. Scope and pricing follow a fit call.
